

I am currently rated 100% disabled through the Veterans Administration and I also hold a Technician license. I would like to upgrade to a General class; but I have tremors in my limbs which make it difficult to complete element 1.

If this requirement is moved to the Extra class, it would provide many disabled Veterans the ability to use the HF bands; which in turn provides necessary communications for many that are housebound.

I concur and support RM-10784.
